

Satin Balls: this is great for putting weight on an animal quickly, as some use it for putting a couple extra pounds on a show animal prior to the big day, or an animal that may have been ill and needs a weight gain program. It will also help with some forms of hair loss, such as when your dog(s) blow their coat, to keep the coat healthy and shiny. This recipe is intended to be fed raw.

10# hamburger meat -- preferably the fattiest you can get like 70-75% lean
1 jar wheat germ
1 large canister of oatmeal (uncooked) (like quaker oats)
1 1/4 Cup vegetable oil
10 eggs
10 small packages of flavorless gelatin
1 1/4 Cup molasses
A pinch of salt
1 large box Total cereal (2 lb)

(You may also add a pinch of garlic powder to add flavor)

Mix all ingredients together well, much like a meatloaf and roll into small to med sized meatballs. Put into separate freezer bags and freeze, thawing out as needed. It puts weight on in a very short time, not to mention the gloss in their coat. You can use it every day when they have a show to do and it does not produce diarrhea. It can be fed alone or with kibble.

I feed 4-5 a day. 3 in the morning as a treat and 1-2 with their food at night.
